## K-Tip (Flat Tip) Hair Extensions

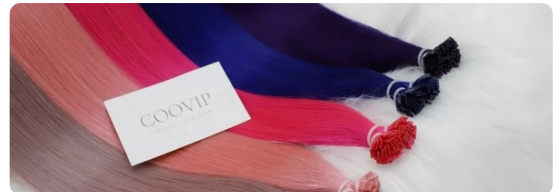

### PROFESSIONAL INSTALLATION & CARE GUIDE

ITALIAN KERATIN BOND

100% RAW HUMAN HAIR

360° NATURAL MOVEMENT

COOVIP K-Tip (Flat Tip) Hair Extensions are crafted from 100% raw virgin human hair, bonded with premium Italian keratin. The flat tip design offers 360° natural movement and a seamless, damage-free blend. Curl, colour, straighten and wash freely — the professional choice for long-lasting individual strand extensions.

Specification	Details
<b>Hair Type</b>	100% Raw Virgin European Human Hair
<b>Texture</b>	Natural Straight / Soft Wave When Air-Dried

<b>Bond Size</b>	0.5 cm x 0.7 cm flat keratin tip
<b>Lengths Available</b>	18" - 24" (45-61 cm); Custom to 32"
<b>Recommended Amount</b>	100g - 200g (100-200 strands) full head
<b>Application</b>	Hot Fusion — Professional Fusion Iron
<b>Heat Temperature</b>	160-180°C (320-356°F)
<b>Heat Safe</b>	Yes — Style Freely Up to 180°C
<b>Move-Up Interval</b>	Every 6-8 Weeks Recommended
<b>Lifespan</b>	2-3 Years With Proper Care
<b>Keratin Bond</b>	Premium Italian Keratin — Residue-Free
<b>Custom Options</b>	Colors, Lengths, Textures, Packaging

KEY ADVANTAGES
<b>✓ Natural Appearance</b> Individual strand application ensures a seamless blend. Hair moves and falls exactly like your own.
<b>✓ Durable Hold</b> Italian keratin bonds provide a firm hold lasting up to 3 months with proper maintenance.
<b>✓ 360° Versatile Styling</b> 100% raw human hair — curl, straighten, colour, and wash just like natural hair.
<b>✓ Comfortable Flat Tip</b> The flat tip design lies close to the scalp with minimal bulk and no tension on roots.
<b>✓ Safe &amp; Damage-Free</b> Gentle keratin bonding process. Removal with keratin remover — zero damage to natural hair.
<b>✓ Fully Customizable</b> Available in 100+ shades and lengths. Custom colour matching, wholesale & private label for salons.

### How Many Strands Do I Need?

Amount	Strands	Effect	Best For
<b>50g</b>	50 strands	Subtle blend & fill	Thin areas, crown top-ups
<b>100g</b>	100 strands	Noticeable length & volume	Medium density, full coverage
<b>150g</b>	150 strands	Significant volume boost	Thick hair, added length
<b>200g</b>	200 strands	Full dramatic transformation	Short / coarse hair, major length

**Tip:** Always leave a 1-2 cm shadow zone at the entire hairline perimeter. Never place bonds flush to the hairline — this keeps bonds hidden and prevents scalp tension.

## Step-by-Step Installation

HOT FUSION METHOD | Professional fusion iron required · 160–180°C

**01**

### Section & Prepare Hair

Take a small wisp of natural hair equal to or slightly less than the extension strand weight. Secure remaining hair with clips. Hair must be clean and completely dry.

**02**

### Position the Keratin Tip

Insert the K-tip strand through the precision clip close to the scalp root. Hold the lower portion firmly with your fingers to keep it stable.

**03**

### Apply the Fusion Iron

Place the dedicated fusion iron around the flat keratin tip and natural hair together. Align carefully for a flush, seamless result.

**04**

### Melt & Fuse — Hold 5 Seconds

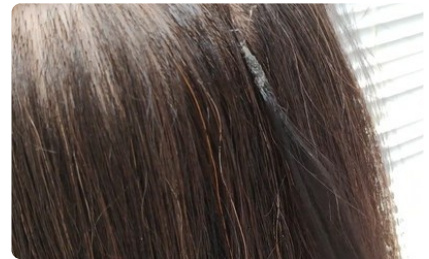

Clamp the fusion iron firmly for approximately 5 seconds until the keratin tip is completely melted and fused into the natural hair strands.

**05**

### Roll Into a Round Rod

While the keratin is still warm and pliable, gently twist and roll the bond between your fingers to create a smooth, compact round bond.

**06**

### Finished — Check the Result

A well-applied bond is flat, smooth, and sits 1 cm from the scalp. Repeat the process, working section by section across the head.

**Removal:** Apply a keratin-safe remover or oil around each bond. Gently roll the softened keratin to loosen, then slide the tip off — no damage to natural hair. Schedule a professional move-up every 6–8 weeks for best results.

## Tools Required

Tool	Purpose
<b>K-Tip Extension Strands</b>	Pre-bonded Italian keratin flat tips — color-matched, ready to fuse
<b>Professional Fusion Iron</b>	Heats keratin tip to 160–180°C for a secure, clean bond
<b>Tail Comb</b>	Clean horizontal and sub-sectioning for even strand placement
<b>Sectioning Clips</b>	Hold upper layers away while applying each row
<b>Keratin Bond Remover / Oil</b>	Dissolves keratin bond cleanly for safe, damage-free removal
<b>Loop / Extension Brush</b>	Gentle detangling from ends upward without stressing bonds

## Aftercare & Maintenance

WASHING	DRYING	BRUSHING	REMOVAL & MOVE-UP
<ul style="list-style-type: none"> <li>Use sulfate-free, color-safe shampoo 2-3x/week.</li> <li>Avoid conditioning near bond roots — weakens keratin.</li> <li>Rinse cool or lukewarm; condition on ends only.</li> </ul>	<ul style="list-style-type: none"> <li>Air-dry whenever possible, near the bond area.</li> <li>Blow-dry on medium heat (100-120°C) with protectant.</li> <li>Never sleep with wet hair — prevents matting at bonds.</li> </ul>	<ul style="list-style-type: none"> <li>Brush from ends upward, holding near bond while brushing.</li> <li>Use a loop extension brush only — no paddle brushes.</li> <li>Sleep in a loose braid on a silk pillowcase.</li> </ul>	<ul style="list-style-type: none"> <li>Apply keratin remover around each bond; wait 30s.</li> <li>Gently roll and slide bond off — never pull hard.</li> <li>Deep condition natural hair after removal, then re-apply.</li> </ul>

## COOVIP K-Tip vs Standard Extensions

Feature	COOVIP K-Tip	Standard Keratin Bonds
<b>Hair Grade</b>	100% Raw European Hair	Remy or Lower Grade
<b>Keratin Quality</b>	Premium Italian Keratin	Generic or Unknown
<b>Acid Processing</b>	None — Gentle Processing	Acid Bath Treatment
<b>Silicone Coating</b>	Silicone-Free	Silicone-Coated
<b>Natural Movement</b>	360° — Individual Strands	Limited by Bond Bulk
<b>Damage Risk</b>	Minimal — Safe Removal	Higher if Incorrect Removal
<b>Custom Options</b>	Colors, Lengths, Packaging	Limited
<b>Lifespan</b>	2-3 Years	6-12 Months

## Frequently Asked Questions

### Q: How heavy is each strand?

Each K-Tip strand weighs approximately 1g. We offer customization from 0.3g to 1.5g per tip.

### Q: Which keratin is used?

Premium Italian keratin — gentle on hair and scalp, residue-free, and designed to prevent shedding.

### Q: Is the hair acid-processed?

No. COOVIP hair is processed gently without acids, preserving strength and preventing frizz.

### Q: Can I colour or heat style?

Yes — curl, straighten, colour and wash just like your natural hair. Heat safe to 180°C.

### Q: Is the hair silicone-coated?

No. Our hair is 100% silicone-free, maintaining natural texture and prolonging lifespan.

### Q: How long do they last?

2-3 years with proper maintenance. Schedule a professional move-up every 6-8 weeks.

### Q: How much hair for a full head?

100g-200g (100-200 strands) depending on desired fullness and your natural hair density.

### Q: Do you offer custom packaging?

Yes — perfect for salons and brands. Custom color rings: MOQ 50 packs. Custom packaging: MOQ 300 pcs from \$500/design.
